DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The scope of claim 1 cannot be clearly understood. Claim 1 recites a flooring nailer, yet further claim details of a handle structure mounted on a main body. Therefore, it is unclear as to whether applicant is claiming a combination of a flooring nailer tool and a handle structure mounted on a main body, or just the handle structure. If applicant is claiming a combo, then the preamble should so state.

Claim Objections

2. Claim 9 is objected to because an obvious typographical error. In line 2 of claim 9, the word "and" should be deleted. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3721

3. Claims 1, 4-5, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakamura (US 5,558,570). Nakamura discloses a main body "31" (see Fig. 9), a handle structure "21", a fixing seat via "32" with a first end formed as a locking portion "33" having an L-shaped configuration (see Fig. 12). The handle "22" of the handle structure "21" is combined with the fixing seat "32" and has a first end formed with a snapping portion "24" with an L-shaped configuration snapped on the locking portion "33" of the fixing seat (see Fig. 12). The second end of the handle "22" is formed as a grip portion not shown numerically.

Allowable Subject Matter

4. Claims 2-3, 6-12, and 14 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Riebsamen'311, Gehl'176, Schaffer'607, Haytayan'831, Bull'840, Batts'392, Deziel'472, Anstett'620, Curry'256, and Lower'489 are cited to show related inventions.
